REPORT NO.

CD NO.

COUNTRY East Germany

DATE DISTR. 5 August 1953

25X1 SUBJECT Special Fuel and Experimental Fuel from VEB  
Hydrierwerk Boehlen

NO. OF PAGES 1

NO. OF ENCLS.  
(LISTED BELOW)

SUPPLEMENT TO  
REPORT NO. 25X1C

**SOURCE**

25X1X

A special fuel for tractors, intended to prevent the accumulation of mud in the engine, has been produced at Boehlen. Satisfactory results were obtained by Engineer Schlotz (fnu) of Department 8 of the Deutsche Handelszentrale der Maschinenausleihstation (MAS). The basic material for this fuel is not known.

25X1

1.  Comment: Possibly DHZ-Kraftstoffe und Mineraloel.

25X1A

Comment. Other information indicates that the fraction suitable for jet engine fuel was extracted from Diesel oil with the result that only very inferior fractions causing the accumulation of mud and resin in the engine of the MAS tractors remained for tractor fuel. This may have led to trials for the production of improved Diesel oil mentioned in the above report. Further information is needed, however, to confirm the allegedly satisfactory result of this experiment.
